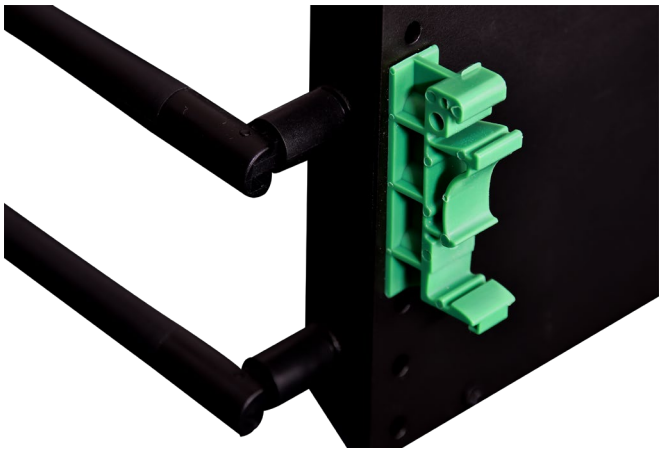
J. DIN rail mounting

There are two MK-048 (10mmLx43mmWx 19mmH)DIN rail mounting pieces on the back of ESPRESSObin enclosure as shown in the picture below.

Please use the appropriate DIN RAIL like MK-070 or similar for mounting on the wall.



K. Preparation for power on

K-1. Hardware:

a. Linux PC installed with minicom, putty or Windows PC installed with putty
b. ESPRESSOBIN ULTRA unit
c. Connect Ethernet cable from IP router or IP switch (optional) to WAN port with or without POE power
d. USB3.0 Flash disks (optional)
e. USB2.0 Flash disks (optional)
f. 3G/ 4G LTE module (optional)
g. M.2 2280 SSD module (optional)

K-2. Software:

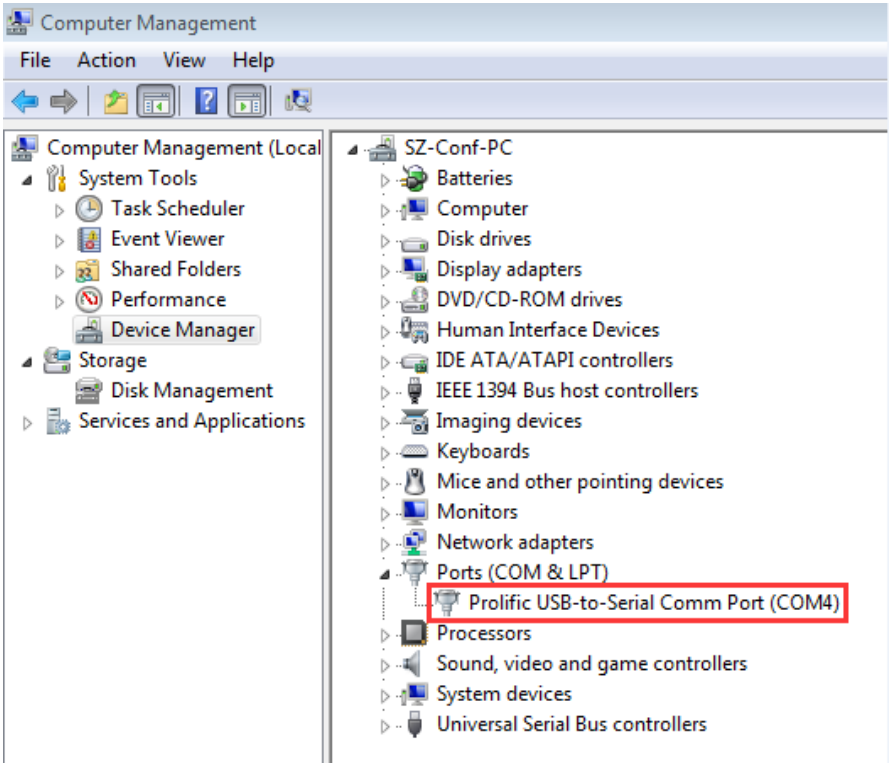
a. Putty for Linux or Windows PC
   Please go on web and download putty.exe

Visit the following web site for more information

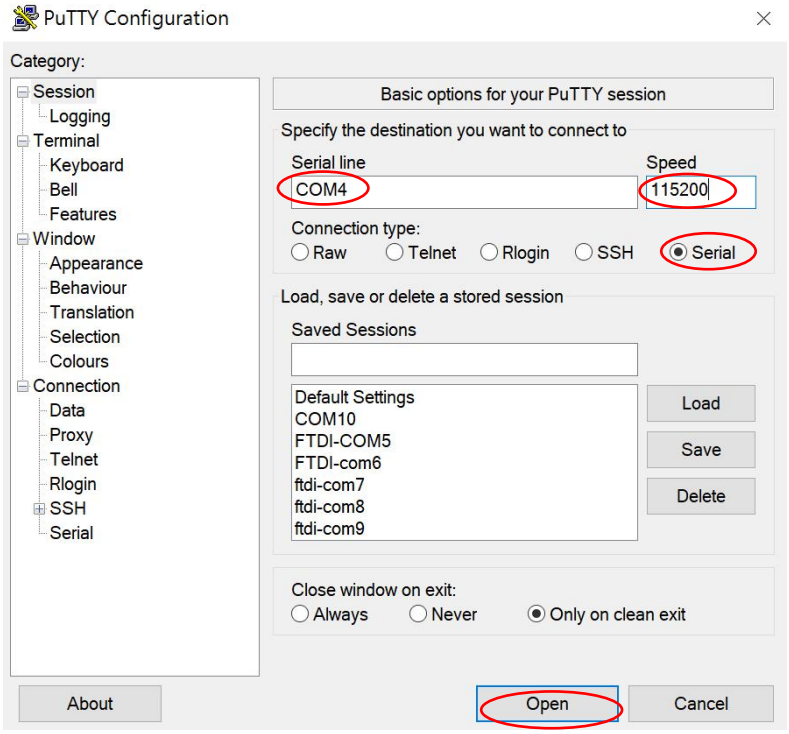
http://www.globalscaletechnologies.com/t-downloads.aspx

L. Find com port and connect with putty

1. Connect ESPRESSOBIN ULTRA's micro-USB port (J5) to PC's USB port by USB cable
2. Go to [my computer] [device manager] and you will see a new COM port after plugging in the USB cable, here is COM4 for example



3. Run putty, select serial connection then enter the COM port you've found in the previous step, The baud rate speed is 115200 then press "open"



M. Start running ESPRESSOBIN ULTRA

M-1. Check U-boot version and some system information

Power on the board then press enter to terminate uboot running, you can see messages on screen like the followings
